

C++ Labs

DrawLineParam

Write a complete C++ program that produces the output shown below. For this lab, you must make a drawline method that takes a parameter that determines the line length. Make the line out of '\$' symbols. For example, if you called drawline(5) method from your main program, the following would be on your screen:

\$\$\$\$\$

Your main method must look like the following:

```
main()
{
    int numlines=15;

    for(int i=0;i<numlines;i++)
    {
        drawline(i);
        cout << endl;
    }
}
```

Sample output:

\$
 \$\$
 \$\$\$
 \$\$\$\$
 \$\$\$\$\$
 \$\$\$\$\$\$
 \$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$\$\$
 \$\$\$\$\$\$\$\$\$\$
